

EUROPEAN SUPERVISOR EDUCATION INITIATIVE

8th ESE Conference 2026

Simplification vs Deregulation | AI in Supervision

Prague, 20 & 21 May 2026

WELCOME ADDRESS

Feline von Heimburg

Chair of the ESE Programme Council

Dear participants!

As we navigate a world of rapid transformation and increasing uncertainty, we must also be ready to adapt the ways we supervise.

I am pleased to invite you to our upcoming conference, where we will explore two pivotal themes that are shaping the future of financial regulation and supervision.

On Day 1, we will engage in a critical dialogue around "Simplification vs Deregulation." Here, we will examine how simpler and more proportional regulations can provide a solid foundation for effective supervision in the banking sector. Given the complexities often associated with banking regulation, this is an opportunity to learn from the experiences of various countries and institutions to identify what works in practice.

As we transition to Day 2, we will shift our attention to the role of artificial intelligence in supervision and the financial industry. We will delve into how AI brings about changes that extend beyond mere tools and processes. From banking supervision to capital market oversight, AI is poised to reshape the landscape of supervision. Additionally, we will also consider the customer perspective, discussing how AI can enhance their experiences, as well as the implications for regulatory frameworks.

I look forward to meeting you in Prague and engaging with you on these captivating topics.

8th ESE Conference 2026 hosted by
